

Buildings. Construction.

Industry-Proven Products.

Industry-Leading Design Solutions.

Agricultural Buildings.

NOR-AG works hard to understand your farm business and we develop solutions that will best meet your building requirements. We offer material packages and can supply construction and project management that suit your requirements.

In addition to standard wood frame construction we offer farm producers advanced and innovative Polymer Concrete Framework Buildings that are ideal for meeting the stringent hygiene levels required in animal production facilities. They are energy-efficient and easy to maintain reducing the need for the frequent maintenance normally required for this type of operation. Small and large agricultural operations such as Poultry, Swine and Dairy now have a cost-effective way to preserve the pristine environment that their business requires, while reducing energy costs. These buildings are mould and mildew resistant and improve air quality. The walls can be quickly and easily washed. Available in a range of sizes these advanced wall forming systems are also easy to install, thereby fast tracking construction and reducing labour costs.

Solutions for Buildings

- *Custom Design Solutions*
- *Purpose-Built Facilities*
- *Material Packages*
- *Design-Build Management*
- *Standard Wood-Frame Buildings*
- *Polymer Concrete Framework Buildings*
- *Pre-Cast Construction*
- *Steel-Frame Construction*
- *Ventilation / Air Quality Systems*
- *Mold and Mildew Resistant*
- *Stringent Hygiene Compliance*
- *LED Lighting*
- *Swine Production Housing*
- *Poultry Housing*
- *Grain Handling Facilities*
- *Site Planning / Permitting*
- *On-Site Construction*
- *Project Management*

The Building Products we supply are supported by Manufacturers Warranties.

Commercial Buildings.

To achieve the greatest impact our team work together with our industrial and commercial customers to understand their immediate and long-term goals, then see their projects through planning, design, permits and construction.

NOR-AG offers conventional wood-frame buildings along with the more advanced Polymer Concrete Framework Buildings. These advanced structures are prepared to order and assembled on-site. They are the ideal choice for new constructions including: Industrial Warehouses, Storage Facilities, Vehicle Wash Facilities, Auto Dealerships and Retail Complexes. Their lightweight construction makes them easy to handle reducing the time and effort required to complete your building projects. The modular components can include built-in insulation, service raceways and rough openings to facilitate rapid construction. The pre-finished walls provide for easy maintenance throughout the lifespan of the products. Engineered to provide a lifetime of savings, they are a smart alternative to conventional construction assemblies such as insulated panel, precast, tilt-up and concrete block walls.

Vehicle Wash Buildings.

If you are planning a Vehicle Wash Facility, consider a low-maintenance Polymer Concrete Framework Building. Our team will work together with you to understand your immediate and long-term goals, then see your project through planning, design, permits and construction.

The advanced polymer concrete framework buildings are particularly well suited for Vehicle Wash Facilities. They are designed to stand up to the unique challenges of vehicle wash buildings. Self-Serve bays, Tunnel Wash buildings, Automatic Wash buildings and Truck and Bus Wash buildings are subject to a great deal of abuse on a daily basis which typically means high maintenance

costs. These high performance structures are easy to install, sturdy and virtually maintenance-free offer an innovative, cost effective solution for any Vehicle Wash Building. The modular components can include built-in insulation, service raceways and rough openings to facilitate rapid construction. Engineered to provide a lifetime of savings, they are a smart alternative to conventional construction assemblies such as insulated panel, precast, tilt-up and concrete block walls.

Design - Build Management.

NOR-AG has established a tradition of excellence, hard work, and a can-do attitude when providing construction services in Ag-Infrastructure including: Farm and Commercial Buildings and in the Retail Buildings and Industrial Buildings markets. No matter the size or complexity - good project management is behind the success of any construction project.

We see every project as an opportunity to bring people together. Our people work with customers to solve problems and create solutions where information and ideas are freely shared and decisions are effectively reached. We have the knowledge and expertise to understand each project's complexities from a variety of angles. This unique perspective enables us to offer innovative and practical solutions to our customers. Our approach is simple. Design solutions with your business in mind, and provide the information and experience you need to make informed choices. By understanding your objectives, we can develop solutions that help your business achieve its goals. Each and every project we complete is unique and critically important to our customers.
