

What We Do.

Industry-Proven Products.

Industry-Leading Design Solutions.

We are a retail company with an overriding commitment to deliver quality and service. We see every project as an opportunity to bring people together. Our considerable experience supports the practical solutions we bring to equipment specifications, facilities design, project management and construction methods. Whether Farm or Commercial, NOR-AG is your ONE Source for Swine Production, Feed Milling, Grain Handling, Poultry Production, Fertilizer Facilities along with Buildings for Farm and Commercial Applications. We supply Industry-Proven Products, Inventory of parts, Service support and offer Industry-Leading Design solutions, Planning and permits, Design-Build construction and Project Management services.

We are problem solvers.

To achieve the greatest impact on process, facility and your organization, our team work together with you to understand your immediate and long-term goals, then see your project through planning, design, construction and operational start-up.

Our practical solutions involve optimizing the flow and layout of facility operations, setting up effective infrastructure that best supports the intended process, while maintaining consistent and high quality production. We deliver significant experience in facilities design, project management, and construction methods. We offer creativity and ingenuity to achieve long-term business and financial success for our customers.

Working together with producers.

We design with your goals in mind.

At NOR-AG, when we take on a project, we see more than a building, machinery, or a construction site. We see every project as an opportunity to bring people together.

It all starts with experience, creativity and well-defined goals, coupled with thorough pre-project planning. Quality and cost-effective design lays the foundation for a successful production facility on your farm.

Maintaining a critical eye on the development of your production facility, our people will work together with you to see your project through design, construction, and operational start-up. Then we will tie it all together to ensure your facility operates safely, efficiently and effectively.

Our practical solutions can help you realize higher efficiency and reduce production costs. By optimizing the flow and layout of your production facility, we're able to ensure efficient production and deliver consistent product quality. We look beyond what is possible today to what will drive success in the future.

We offer experience, creativity and ingenuity that will ultimately achieve long-term sustainability for your farm.

As technology advances Nor-Ag adapts.

Customers are happier when their facility works as it was designed to do and works well when needed. It's not just about the industry-proven and technically advanced equipment. Our design approach includes a clear understanding of your farm operation, your goals and expectations and works to support all of these objectives. At the end of the day, we want to design a properly functioning facility of high quality that ensures the highest level of reliability, productivity, safety, and efficiency.

Helping master efficiency on your farm.

To master efficiency is to continuously improve. We help farm producers improve their production facilities through design and planning, using space more effectively, improve animal health and welfare and reducing costs. We design facilities to increase productivity levels, improve quality, and drive success in the face of a demanding marketplace

Designing for a productive future.

Our approach is simple. Design solutions with your farm in mind, and provide the information and experience you need to make informed choices. By understanding your objectives, we can develop solutions that help your farm achieve its goals. Our people work with producers to solve problems and create situations where information and ideas are freely shared and decisions are effectively reached. We pay attention to emerging technologies and trends that offer increased productivity and compliance with new regulations. We foster teamwork, creativity, and innovation that is responsive and personal. Our experienced people have the drive To achieve the greatest impact on process, facility and the organization, our team work together with customers to understand their immediate and long-term goals, then see our projects through planning, design, construction and operational start-up.

Our practical solutions involve optimizing the flow and layout of facility operations, setting up effective infrastructure that best supports the intended process, while maintaining consistent and high quality production. We deliver significant experience in facilities design, project management, and construction methods.
